

Z67 Controller Card Configuration:

- SW1: 0000 0000
- J1: Port configuration (78h or 7Ch)
- J2: Port configuration (78h or 7Ch)
- J3: Int 4-5 shorted
- J4: Odd
- J5: Reset 32 usec

The following setting of jumpers is for the Z-67 card in the 7C position (right side).
If the Z-67 is moved to the left position so that an H-17 card can be installed in the right position, J1 and J2 will need to be moved to short 1 & 2 instead of 2 & 3.
